

BIO SCIENCE

Logistics Planners analyze and coordinate a company's supply chain — the system that moves a product from the supplier to the consumer and all the other, smaller companies involved in that process. They manage the entire life cycle of a product, which includes how a product is acquired, distributed, and delivered.

LOGISTICS HUB PLANNER

Logistics Planners oversee activities that include purchasing, transportation, inventory, and warehousing. They may direct the movement of a range of products, people, or supplies, from common consumer goods to military supplies to employees. They usually use software systems to plan and track the movement of products. Drivers of delivery vehicles and truck drivers are also a part of the logistics industry.

Those interested in logistics may qualify for some positions with an associate's degree or special training in truck-driving. As a company's logistics operations become more complex, a bachelor's degree may be required. Many logistics planners have a bachelor's degree in business, systems engineering, or supply chain management.

**Average Entry-Level Wage: \$2200/hour;
\$45,760/year**

**Average Mid-Level Wage: \$27.33/hour;
\$56,863/year**

LOGISTICS

COLLEGES ATTENDED BY THE LOGISTICS PROFESSIONAL IN THIS EDITION OF HireEd:

East Los Angeles College

California State University, Los Angeles

COLLEGES THAT OFFER LOGISTICS-RELATED AA DEGREES*

- Cerritos College
- Citrus College
- College of the Canyons
- Compton College
- El Camino College
- Glendale Community College
- East Los Angeles College
- Los Angeles City College
